Profile

Software Engineer with a Bachelor's in Computer Science and hands-on experience building cross-platform mobile and full-stack web apps using React Native, React, TypeScript, and JavaScript. Excited to join a collaborative engineering team, deliver quality features, and continuously grow skills in software development and problem-solving.

Experience

06/2026 — Present
Remote, US

Software Engineer - AI Trainer (Contract) DataAnnotation

- Reviewed 100+ AI-generated React, JavaScript, and TypeScript code snippets to identify logic errors, security vulnerabilities, and edge-case bugs using structured QA workflows.
- Developed detailed prompt scenarios focused on web development tasks to test AI's technical instruction compliance, providing comprehensive feedback and rubric-based grading to enhance performance.

01/2023 — 01/2025
Remote, US

Web Developer (Freelance) thenewoil.org

- Implemented and launched a privacy-first, server-side rendered (SSR) blog site with 1,000 monthly users using Astro.js.
- Translated Figma designs into responsive, multi-theme pages with dynamic routing and multi-language support.
- Worked asynchronously with stakeholders to gather requirements, share progress, and provide continuous site maintenance after completion.

Projects

05/2025 — 08/2025

AI-Integrated Receipt Scanner

- Built a cross-platform React Native mobile app with Expo using Gemini API for vision-based data extraction.
- Handled native device permissions (camera/gallery) and handled client-side state management to ensure smooth data flow.
- Designed and converted UI Figma mockups, ensuring a clean and seamless user experience across multiple screen sizes.

02/2025 — 06/2025

Online Werewolf Board Game

- Built and deployed a real-time multiplayer full-stack web app using TypeScript and Node.js.
- Utilized Socket.IO for state updates and PeerJS (WebRTC) for real-time audio/text communication.
- Implemented CI/CD workflows with Render to automate deployment on GitHub pushes.

01/2026 — 05/2026

Stock Data Analyzer

- Built a C++ backend engine to turn raw CSV stock data into custom candlestick data structures.
- Created a .NET desktop interface to graph stock trends and let users filter by historical patterns.

Education

08/2022 — 05/2026
Tampa, FL

Computer Science | Bachelor's University of South Florida

Technical Skills

LANGUAGES

TypeScript JavaScript Python SQL C# C++ HTML5 CSS3
